Title: Cadaver Course: Protocols and Guidelines for a Predictable GBR Surgical Procedure

Speaker: Dr. Marco Ronda

Level: Advanced

Abstract

Today regenerative surgical techniques are well-known and well-documented, but sometimes are subject to complications that leave serious concerns from the outcome of the surgical procedure.

Soft tissue management is, in fact, the key to understanding the procedure and the incorrect design of the flaps and, in particular, the inadequate application of non-invasive surgical techniques, undermine the efforts of surgeons to obtain clinical and aesthetic results that meet patient needs.

Today we can say that regenerative techniques are no longer “sensitive to operator error” but “sensitive to operator knowledge”.

Course Objective

This advanced course offers the real feel of a clinical setting through the use of fresh, frozen cadavers. The soft tissue handles the same way as in a patient's mouth. Unlike what you may have experienced at other courses, where the density of bone is of styrofoam quality.

The participants in this didactic activity have the opportunity to express, in a definable real context, all their knowledge and that acquired during the course on the application of regenerative bone techniques. GBR flap designs, flap passivation techniques, stabilization and anatomical adaptation of barriers, definition of anatomical structures that could potentially interfere with the application of regenerative techniques will be some of the procedures that participants will learn, test and apply on human repertoire.

Dr. Marco Ronda

He graduated in medicine in 1990 from the University of Verona and has a private dentistry practice in Genoa.

Among the many post graduate courses he attended the one-year-course advanced surgery held by Prof. Massimo Simion in Milan (2001) and attended a Master course in Regenerative Surgical Techniques at the University of Pennsylvania (2003).

He annually attends the meetings organized by the 'American Academy of Implant Dentistry' and several specialized courses on the techniques of horizontal and vertical bone regeneration.

He also participates annually at the Continuing Dental Education Program (CDE) at the New York University College of Dentistry.

In 2011 the International Journal of Periodontics & Restorative Dentistry published his study reporting a new surgical technique of lingual flap management appropriate in all cases of increase in

bone volume; in the same magazine in 2014, a new clinical study on the management of the buccal flap titled "A novel approach for the coronal advancement of the buccal flap" has been published. He is also author of an article published on COIR magazine comparing the clinical outcomes in GBR with the e-ptfe and d-ptfe non resorbable membrane.

From 2014 to date he periodically provides a semester of practical training courses in implantology and bone regeneration techniques at his private practice.

He is an active member of the IAO (Italian Academy of Osseointegration) and co-founder of the Piezosurgery Academy.

*This clinician has, or in the last 2 years had, financial relationships with Zimmer Biomet Dental resulting from speaking engagements, consulting engagements and other retained services.

Logistics

Hotel U232 (4-star hotel)

Comte d'Urgell, 232, 08036 Barcelona, Spain
Tel. +34 93.322.41.53, www.u232hotel.com

Special Zimmer Biomet Room Rates

Room for single and double: 140 Euro incl. breakfast excl. Tax
Please book online under www.u232hotel.com
and use the reservation code: Biomet

Group Dinner on Friday December 1, 2017

Restaurant BarcelonaMilano
Villarroel 190, 08036 Barcelona, Spain
This is for participants and faculty only.

Course Venue

Facultat de Medicina, Room: Sala de Dissecció / Floor: Sala 0,
C/Casanova, 143, 08036 Barcelona, Spain

Registration and Contact

Registration

To register for this program please visit the website:
<http://zimmerbiomet.cvent.com/d/l5q48z>

For additional information, please contact

Zimmer Biomet Institute, Ms. Sophie Garzia
Phone +41 58 854 84 75
sophie.garzia@zimmerbiomet.com

¹⁾ Course fee includes one dinner, lunches, break refreshments, one scrub set and all course materials.

Registration and Cancellation Policy

In order to provide each course participant with a focused and personalized educational experience, the number of registrants is limited for each course. Registration is accepted on a first-come, first-served basis. The Zimmer Biomet Institute reserves the right to cancel courses that do not meet minimum enrollment no later than 14 days prior to the course date. Zimmer Biomet Institute is not responsible for reimbursement of a nonrefundable airline ticket or any other travel expenses in the event that a course is canceled. In the event that a registrant needs to cancel, written notification must be sent to sophie.garzia@zimmerbiomet.com.
